PREFACE

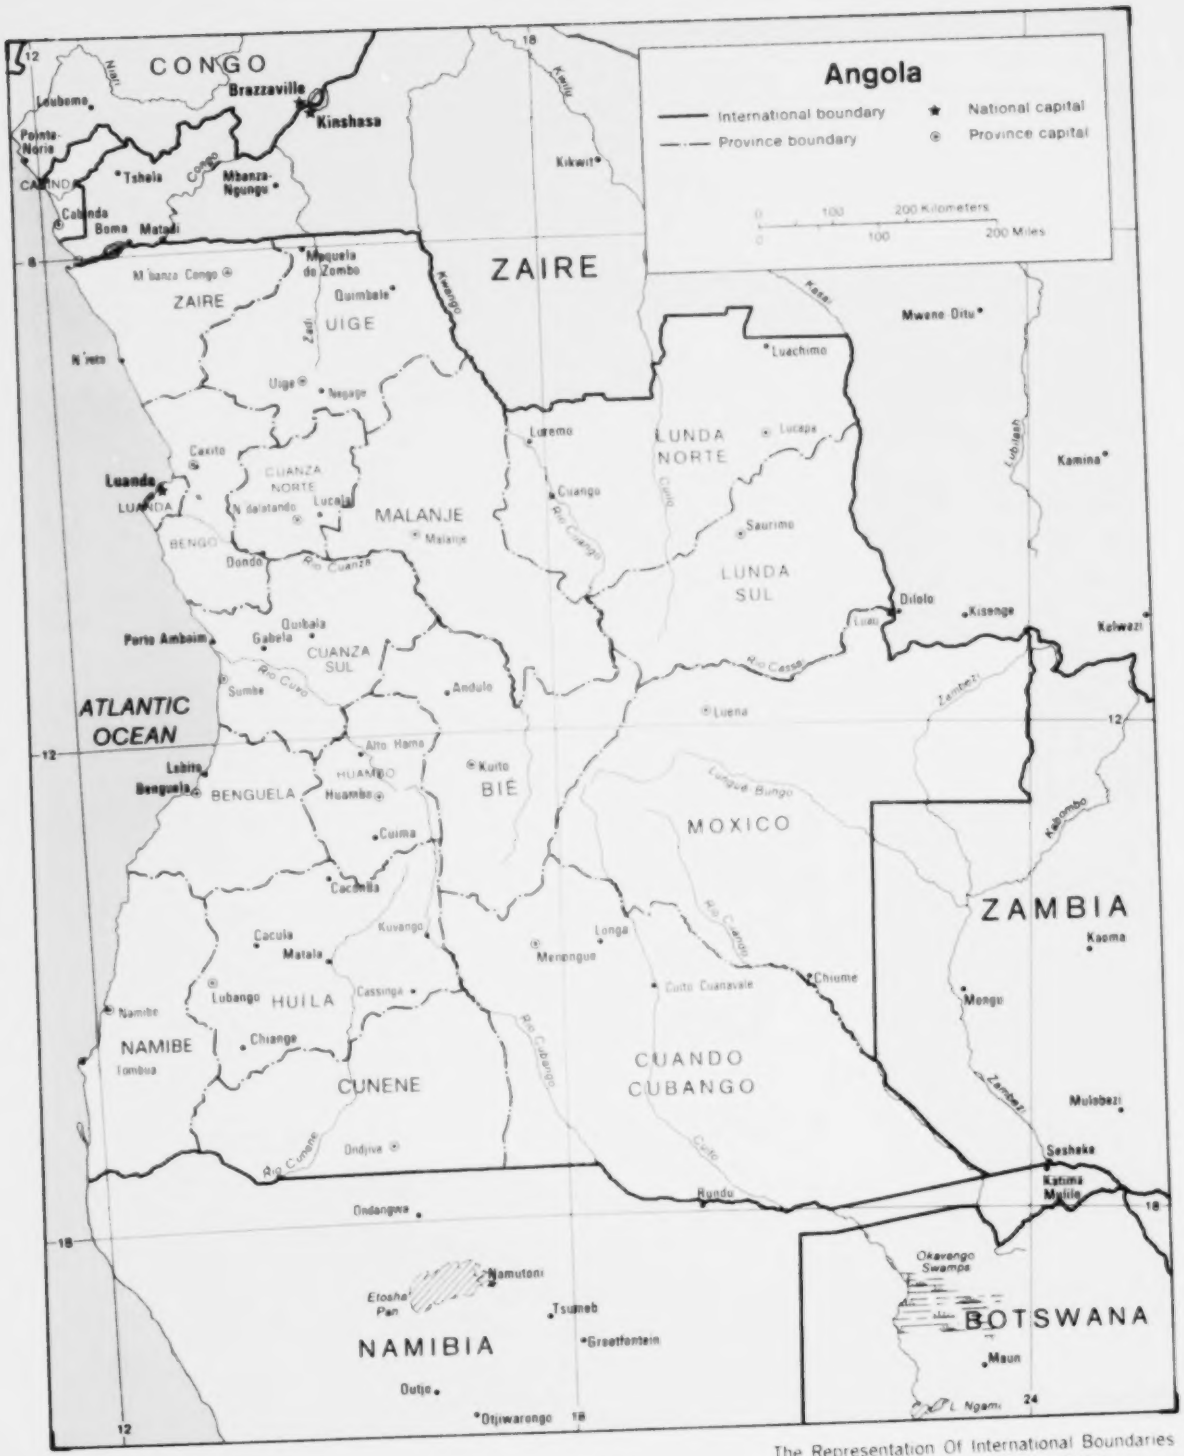
UNITED STATES BOARD ON GEOGRAPHIC NAMES

The United States Board on Geographic Names (BGN) is the official United States body created in 1890 to provide for uniform usage of geographic names throughout the Federal Government. Established in its present form by a Public Law enacted in 1947, BGN operates through several committees to standardize names of geographic features in the United States, foreign areas, Antarctica, undersea areas, and extraterrestrial bodies. According to the law, the Board shares its responsibility with the Secretary of the Interior. In the exercise of this responsibility, the Secretary approves names recommended by BGN, appoints members to certain committees, and ratifies principles and procedures. Members of the Board, representing various Federal departments and agencies, serve for two-year terms.

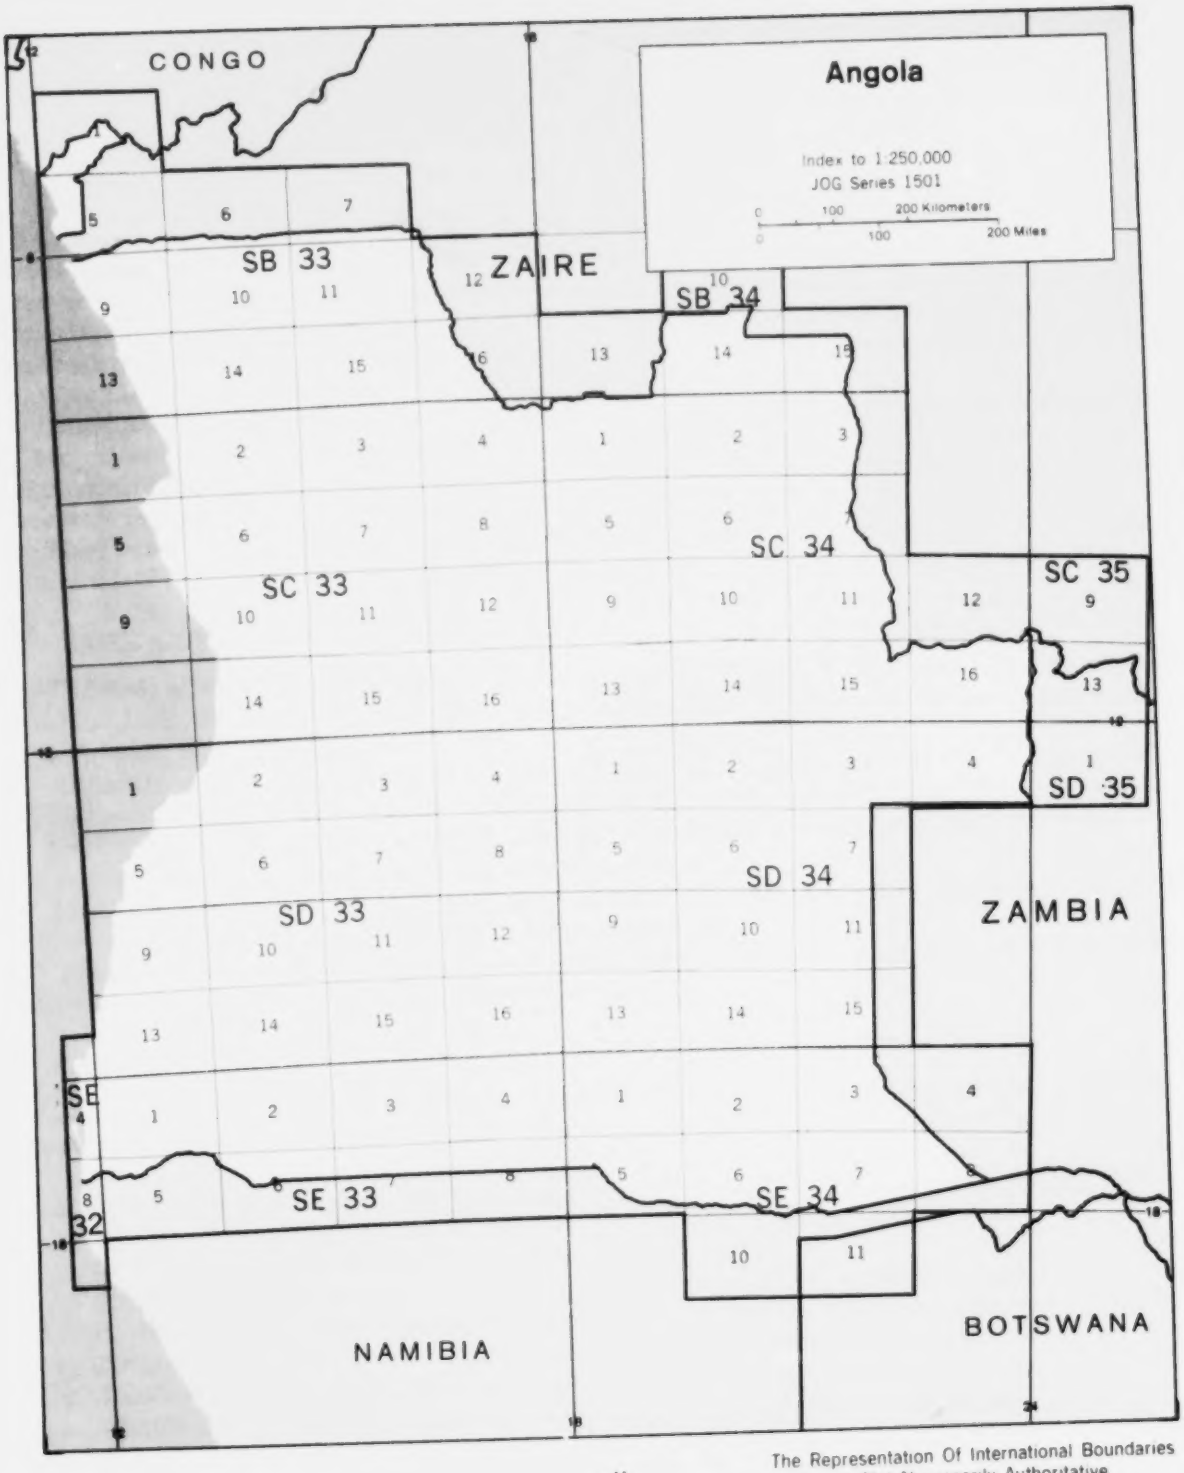
Essential to the Board's function of standardizing names is the promulgation of names information. Traditionally, names of geographic features outside the United States have been published in a series of BGN gazetteers, and the needs of a wide range of users—both within the Federal Government and elsewhere—have been well served by these publications. The present gazetteer is one of a new series of place-name documents. Universal Transverse Mercator (UTM) grid coordinates, allowing even wider use of the gazetteers because they permit feature identification by the UTM reference system, are included. Other features of the gazetteer are explained in the introduction.

The responsibility for producing and distributing the gazetteers has been assigned to the Defense Mapping Agency as part of its overall mission of supporting foreign-area scientific studies for the Federal Government. The production of gazetteers is based on the work of linguists, geographers, and cartographers, who use a variety of source materials. Wherever possible, gazetteer production is carried out with the cooperation of the concerned country.

RICHARD R. RANDALL
Executive Secretary
United States Board
on Geographic Names



The Representation Of International Boundaries Is Not Necessarily Authoritative



The Representation Of International Boundaries Is Not Necessarily Authoritative

INTRODUCTION

1. GENERAL

This gazetteer contains approximately 25,500 entries for places and features in Angola. The entries include names which are approved by the United States Board on Geographic Names (BGN) and unapproved variant names which are cross-referenced to the approved names. *Users of the gazetteer should always refer to main entries for approved names and for additional information which sometimes accompanies them.* The approved names in this gazetteer supersede those in previous gazetteers containing BGN-approved names and in Defense Mapping Agency (DMA) publications for the area.

This document constitutes a recompilation of the first edition of the gazetteer of Angola, published in 1956. Research for this second edition was completed in December 1984. The names of all cultural and physical features, the names of first-order administration divisions, and all forms of the country name were re-examined and many new entries were added.

The People's Republic of Angola covers an area of 1,246,700 square kilometers [U.S. Department of State, *Background Notes: Angola (1979)*] and has an estimated population of nearly 8 million.

2. NAMES COVERAGE AND EVALUATION

The basic names coverage corresponds to that of maps at the scale of about 1:1,500,000, supplemented by partial 1:250,000-scale coverage. Maps at the scale of 1:100,000 were used to verify names records for the present revision.

Although a considerable number of names derived from earlier 1:2,000,000-, 1:1,500,000-, and 1:250,000-scale maps, published between 1934 and 1953, are not shown on the map sources used for the present edition, the names have been retained pending future verification and are marked with a dagger (†) to permit ready identification in the names listing.

Entries include the names of first-order administration divisions, populated places, other cultural features, and a variety of topographic and hydrographic features.

The quality of names in this gazetteer is considered good for names based on more recent sources and fair for those based only on earlier sources.

3. PRINCIPAL SOURCES

Most of the names in this gazetteer can be identified and located by the approved name or by a recognizable variant of the approved name on one or more of the following sources:

a. *Carta de Angola 1:100,000,* Ministério de Ultramar, Serviços Geográficos e Cadastrais, 1957-1969.
b. *Joint Operations Graphic 1:250,000,* (Series 1501), published by one of the following:
   (1) U.S. Army Map Service (Washington), 1966-67.
   (2) Defense Mapping Agency Hydrographic/Topographic Center (Washington), 1975-81.
   (3) Director of Military Survey, Ministry of Defence (United Kingdom), 1968 and 1973.
c. *Carta Rodoviária de Angola 1:1,500,000,* Junta Autónoma de Estradas de Angola, 1974.
d. *Angola, Mapa Físico 1:2,500,000,* Instituto da Geodesia Cartografia e Cadastro, 1980.
e. *Atlas Geográfico,* Volume 1, Ministério da Educaçao, República Popular de Angola, 1982.

4. INTERPRETATION OF ENTRIES

Name (Column 1)—Approved names and unapproved variant names appear in the first column. Approved names are printed in roman type. The variant names are always cross-referenced to the approved names by use of the word "see" and are italicized in the listing.

Where part of a name is underlined, the use of the part not underlined is optional. If more than one name is approved for a feature, each name is identified in brackets and any or all of those names may be used.

Local names of international features are identified by country labels. If only one name is so identified, the name form preferred by the adjoining country has not been determined.

Entries in this gazetteer are listed in alphabetical order following standard English lexical practice. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Porto Saco*, the name of a port, is listed as *Saco, Porto*.

Portuguese names follow standard Portuguese orthography. The diacritical marks used in this gazetteer are the acute (´), the circumflex (ˆ), the tilde (˜), the grave accent (`), and the cedilla (¸). The same marks are to be used whether the names are written in all capitals or in capital and lowercase letters. No attempt has been made to normalize diacritical marks on African names.

Numerals contained in names are spelled out. Cross-references are included for names containing numerals when Roman numerals rather than Arabic numerals are used in the name. Examples:

Chicaca I: see Chicaca Primeiro
Mulanza II: see Mulanza Segundo

Since most stream names found on the principal sources used for this revision did not include the generic *rio*, the generic term has been omitted from the approved names for those streams to more accurately reflect local usage. Cross-references for stream names which differed from the approved form only in the omission or addition of this generic term have not been included in the gazetteer.

Designation (Column 2)—The second column contains designation codes, as listed below. Since many geographic terms have varied meanings, the senses in which the designations are used and the range of features to which they are applied *in this gazetteer* are stated in the list. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Angola, some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADM1	first-order administrative division (*província*)
AREA	area (tract of land identified by a name, but without known homogenous character or established boundaries; may be identified and named for characteristics which no longer pertain to it)
BAR	sandbar (deposit of water-borne sand at or below the water level)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BCH	beach (deposit of sand or other unconsolidated material along a shore)
BNK	bank (an elevation of the sea floor; may support islands, shoals, reefs or bars on its surface which are dangerous to navigation)
CAPE	cape (seaward end of a projection of land of such position and size as to affect the course of ships)
CLF	cliff (high, steep rock face overlooking a lower area such as a waterbody, coastal lowland, or valley)
COVE	cove (small bay)

CRKT	tidal creek (watercourse that is tidal in its entire length, usually in coastal marsh or other wetland)
DAM	dam (barrier constructed to impound water)
DSRT	desert (barren tract characterized by arid climate and sparse xerophytic vegetation)
ESTA	agricultural estate; plantation (large, commercialized agricultural landholding with associated buildings and other facilities)
FLL(S)	waterfall(s)
FORD	ford (place where a stream may be safely crossed without a bridge or boat)
FT	fort (military post; defensive structure or works, possibly of little or no present military significance, may be in a state of ruin)
GRGE	gorge (relatively narrow, steep-sided segment of a watercourse)
HDLD	headland (conspicuously high piece of land jutting out into or fronting the sea)
HLL(S)	hill(s) (landform of moderate relief, moderate elevation, and small summit area)
HSP	hospital
INLT	inlet (small, narrow indentation in a coast; may form the mouth of a minor stream)
ISL(S)	island(s)
LCTY	locality (minor area or place of unspecified or mixed character and indefinite boundaries)
LGN	lagoon (waterbody along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)
LK(S)	lake(s)
MN	mine (undifferentiated)
MRSH	marsh (wetland characterized by grass or low bush vegetation, few if any trees)
MSSF	massif (elevated, generally mountainous block of the earth's crust)
MSSN	mission (may include dwellings, schools, and other facilities)
MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)
MTS	mountains; mountain range
PCLI	independent political entity (republic)
PK(S)	peak(s) (separately named summit on a more extensive elevation)
PLAT	plateau (extensive elevated area of flat to rolling surface; may exhibit considerable local relief due to dissection or the presence of hills or mountains rising above the general surface level)
PND	pond (small, standing waterbody)
PNDI	intermittent pond (seasonal waterbody which becomes a pond during periods of rain but which dries up or becomes a marsh or waterhole during the dry season)
PPL	populated place (city, town, village, or other agglomeration of buildings where people live; includes farm-related settlements which may or may not contain the generic *fazenda*)
PPLD	dispersed populated place (rural settlement occupying wooded savanna area; may include some facilities other than dwellings)
PRK	national park

PRT	port (place where waterborne cargo is transferred to and from ships; may include facilities for berthing ships and handling cargo)
PT	point (relatively minor projection of land, or its extremity, into a waterbody)
RDGE	ridge(s) (elongated, relatively narrow relief feature with a more or less continuous crest)
RES	reserve (land set aside for unknown, multiple, or unspecified purposes)
RESN	nature reserve
RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or combination of conditions)
RKL	rock on land (boulder, pinnacle, crag, or other rock outcrop situated on land)
RKSL	rocks on land
RKSW	rocks in water (rocks of such character and importance as to be identified by name, situated either above or below the surface of a body of water)
RPDS	rapids
RSTN	railroad station
RSV	reservoir (large, artificially impounded body of water)
RUIN	ruin (structure(s) in a state of ruin, but not necessarily of great antiquity or archaeological interest)
SCH	school
SCRP	escarpment
SHOL	shoal (an offshore hazard to navigation with a least depth of 20 meters [or 10 fathoms] or less, composed of unconsolidated material)
SPNG	spring(s), hot spring(s)
STM	stream (river or other running, fresh waterbody, perennial in all or part of its course)
STMA	anabranch (stream that leaves the main stream and rejoins it after following a separate course for a considerable distance)
STMI	intermittent stream (seasonal watercourse; no part indicated as perennial)
STMM	stream mouth
STMX	section of stream (separately named part of a stream, not delimited by significant confluences)
STNA	agricultural station (may involve horticultural and/or animal husbandry activities)
SWMP	swamp
WLL	well (dug or drilled source of water)
WTRH	waterhole (place in an otherwise dry area where water is obtained by wild or domestic animals; includes rain pools)

Latitude and Longitude (Columns 3 and 4)—The third and fourth columns list geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only. Coordinates were read at the map symbol for populated places and features occupying limited sites, at the mouths or lower ends of streams, at the summits of hills and mountains, at the extremes of capes and points, and near the centers or midpoints of other features.

Area Code (Column 5)—The code in the fifth column indicates the country and the first-order administrative division in which the feature is located. The following codes apply to Angola:

AO00	ANGOLA	AO10	Luanda
AO01	Benguela	AO12	Malanje
AO02	Bié	AO13	Namibe
AO03	Cabinda	AO14	Moxico
AO04	Cuando Cubango	AO15	Uíge
AO05	Cuanza Norte	AO16	Zaire
AO06	Cuanza Sul	AO17	Lunda Norte
AO07	Cunene	AO18	Lunda Sul
AO08	Huambo	AO19	Bengo
AO09	Huíla		

The general code AO00 is used to identify international features and features common to two or more first-order administrative divisions within Angola.

The codes correspond to those used in the Federal Information Processing Standard (FIPS 10-3), *Countries, Dependencies, Areas of Special Sovereignty, and Their Principal Administrative Divisions*, published by the U.S. Department of Commerce.

Universal Transverse Mercator (UTM) Grid Reference (Column 6)—The reference in the sixth column consists of a two-letter UTM 100,000-meter grid square identification and a two-digit number that locates the southwest corner of a 10,000-meter grid square containing the geographic coordinates of the feature.

JOG Sheet Number (Column 7)—The map sheet numbers which accompany all names entries are based upon the Joint Operations Graphic (Series 1501) worldwide map sheet numbering scheme. While each sheet number is derived from the geographic coordinates listed in the third and fourth columns of each entry, the named feature may not actually appear on the referenced map sheet. In addition, the listing of a Series 1501 map sheet number in this column does not necessarily denote that the map sheet exists at the present time or is available.

5. GLOSSARY OF GENERIC TERMS

The following terms appear in the generic parts of approved names in this gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials and do not necessarily reflect dictionary definitions. The parenthetical abbreviations (B) and (Fr) designate Bantu and French entries, respectively; the remainder are Portuguese.

albufeira	reservoir
baía	bay
baixo(s)	shoal(s)
banco	bank, sandbank
barra	bar, sandbar
barragem	dam
barreiras	cliff
cabeça	point, headland
cabo	cape

cacimba	well
canal	stream
chana (B)	intermittent pond
coutada	reserve
damba (B)	stream
deserto	desert
enseada	bay, cove
estação zootécnica	agricultural station
etala (B)	lake(s), pond, waterhole
fazenda	plantation
fonte	spring
forte	fort
hospital	hospital
île (Fr)	island
ilha(s)	island(s)
ilhéu(s)	island(s)
lago	lake
lagoa(s)	lakes(s), inlet, tidal creek, marsh, swamp
missão	mission
monte	mountain
morro	hill, mountain
mulola	stream
parque nacional	national park
pedra(s)	rock(s) on land
planalto	plateau
ponta	point
porto	port
portada	stream mouth
posto agrícola	agricultural station
posto experimental	agricultural station
posto zootécnico	agricultural station
praia	beach
província	province
queda(s)	rapid(s), waterfall(s)
rápidos	rapids
reserva especial	reserve
reserva natural	natural reserve
rio	stream
rocha	rock
saco	bay
serra	hill, mountain(s), peak, ridge
tala	pond
vau	ford

6. REPORTING OF ERRORS

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors and name changes to either of the addresses listed below. Please include references to, or copies of, the sources upon which the proposed changes are based.
